

# Tennis 100/100+

Rugged Slim Portable Solution

## Features

- Hot swappable high capacity Li-Ion 190Whr battery for continuous operation
- Highly mobile platform for data acquisition and measurement applications
- 15" LCD display guarded with anti-glare tempered glass protection
- Core™ 2 Duo processing power with multi-drive capability
- Power monitoring functions with fast-charge capability
- 2 full length expansion slots with quick-install feature

Anti-reflection tempered strengthen glass

2x 2.5" SATA HDD removable bays

Integrated 2 high capacity Li-Ion battery packs

2x full length PCI slots

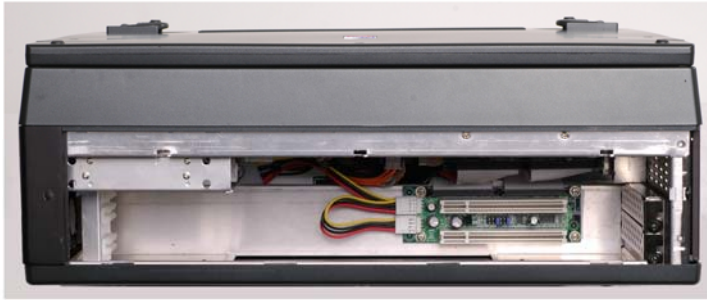

## Introduction

The Tennis product family is a light weight and compact portable computer with multi expansion slots and battery power option. The Tennis 100 Plus equips with battery capacity up to 190Whr for accommodating data acquisition and test & measurement peripheral cards. With large memory capacity, Core™ 2 Duo processing power and multi-drive capability, the system can easily outperform, out-expand and out-maneuver any portable computer in the market today

The Tennis was designed with high mobility in mind and the option to install standard PCI add-on cards. With the built-in battery power, the system can deliver up to 100W of combined load without limiting the operation hour. The Tennis offers an exceptional value for field work environment where AC power source is not always available.
